To Whom It May Concern,

We have worked with Tim Everson for the past 7 years, including the development of our Pine Ridge Data Center. Most recently we worked with Tim's company SiTESPAN as we developed the last phase of this facility. Because of our positive experience in working with Tim and SiTESPAN as a design-builder we offer this sincere letter of recommendation.

As a design-builder Tim has been able to balance the delivery of quality, budget, and schedule to fit the demands of our business. At times our sales driven growth has created project schedule demands that we felt were impossible to meet, however; each time SiTESPAN and the rest of Tim's team have accomplished nearly impossible delivery objectives.

As is the case for any business owner; finding business-to-business relationships is difficult. Especially lasting relationships where true value is gained. We confidently rely on Tim and the other folks at SiTESPAN to provide Design Management, Construction Management, and operational training critical to our core business.

Tim and SiTESPAN exercise real customer focus and add value to each and every step of our projects.

Sincerely,

A handwritten signature in blue ink, appearing to read "Gary Hall", is written over a light blue circular graphic element.
